Subject: IAA News Release: Actuaries Support Commitments in Paris to Address Climate Change

News Release

November 22, 2015

[version française](#)

Actuaries Support Commitments in Paris to Address Climate Change

On November 18th, the International Actuarial Association (IAA) issued a [public statement](#), on behalf of the actuarial profession, in support of the objectives of the 2015 United Nations Climate Change Conference, COP 21. COP21 will be a crucial conference, as the IAA believes that strong commitments by all countries to address this issue are needed. The conference objective is to achieve a universal agreement on efforts regarding our climate, to reduce greenhouse gas emissions to limit the global temperature increase to no more than 2°C above pre-industrial levels.

The IAA, through its Resource and Environment Working Group, supports the need to mitigate, manage and increase awareness of climate-related risks to human life and property and their potential impact on the world economy. Actuaries focus broadly on risks and risk mitigation in order to help assure the resilience of financial systems and institutions. Our support for the COP 21 initiatives is consistent with our commitment to the sustainability of financial systems and institutions across the globe.

The statement supports the IAA's strategic objective to provide actuarial input to improve the soundness of decisions being made on issues with global impact.

To learn more about the work of the IAA in this area, please contact the [Supranational Relations Manager](#) at the [IAA Secretariat](#).

The International Actuarial Association is the worldwide association of professional actuarial associations, with a number of special-interest sections for individual actuaries. Founded in 1895, the IAA exists to encourage the development of a global actuarial profession that is acknowledged as technically competent and professionally reliable, ensuring that the public interest is served. The IAA has 67 Full Member Associations, representing 98 percent of qualified actuaries worldwide, and 29 Associate Member Associations.
